RICH MATHS INVESTIGATIONS

Honey code
1

The bee keeper must ensure the hive is protected at all costs. Many bees are locked to secure the safety of the hive. This hive has been locked with a combination lock and you need to access it in the next 15 minutes. On the side of the hive, there is a riddle.

If the honey you wish to free,

Start with the square of 3.

Multiply by 2 squared,

Double it,

Add the product of 5 x 6,

Then subtract the multiple of 9 nearest to 50.

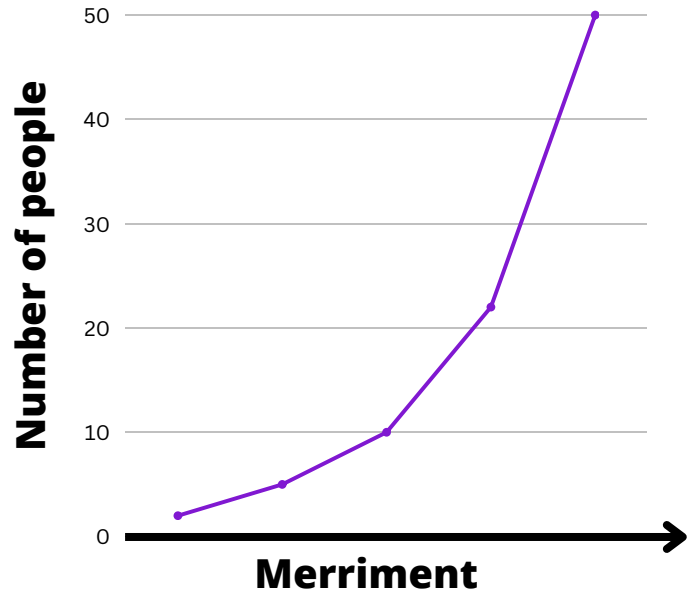

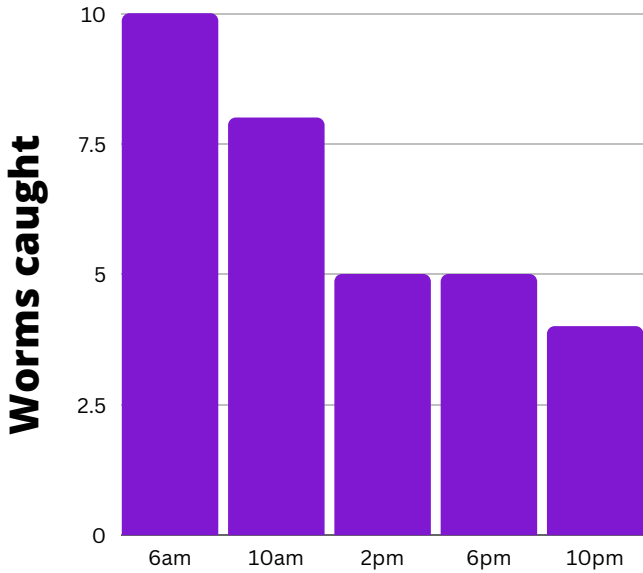

Add all of the factors of 12.

Calculate the total and then add 7 x 2.

Enter this code to access the hive.

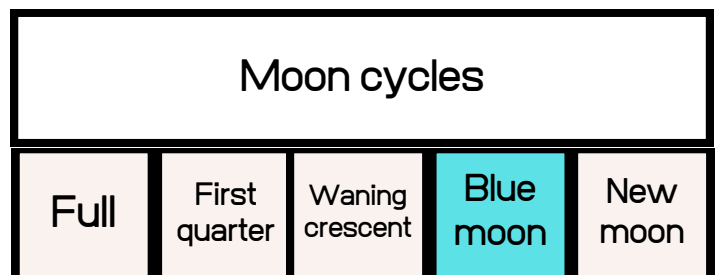

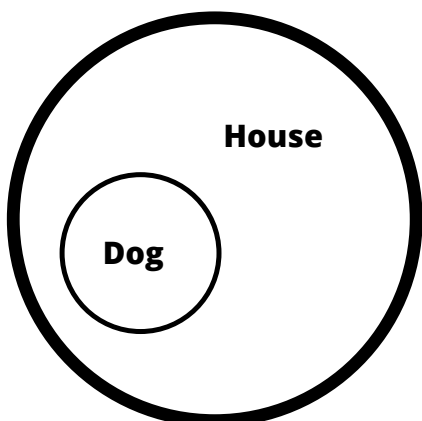

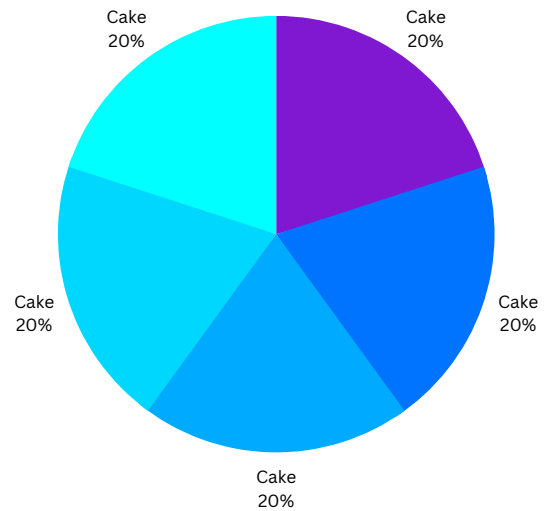

Can you work out which well-known sayings are represented by each graph?

Animals that can fly

Animals that cannot fly

Multiplication
patch
3

Honeycomb
squares
4

What the the missing number?

Hexagon six

5

Use digits 1 - 6 in each hexagon. Where the sides of the hexagon meet, the adjacent segment has the same number. No digit can be repeated within a hexagon.
